Address

Thirupoondi, Nagapattinam

Education

2023-2027

B.Tech in Artificial Intelligence and Data Science

Arifa Institute of Technology

2021-2022

Higher Secondary (Computer Maths)

Government Higher Secondary school

Technical Skills

Web Technologies:

- HTML
- CSS
- React.js

Programming Language

- Python (Moderate)

Tools/Platform

- VS Code
- Jupyter Notebook
- Github
- PowerBI
- Tableau

Other Tools

- MS Office
- Canva
- Figma

Language

English

Tamil

Arabic (R&W)

Internship Experience

July 2025

Maanavan Learning Center LLP

Web Development Intern

Completed an internship on scalable web development using Django and modern front-end frameworks, demonstrating strong dedication, punctuality, and a continuous eagerness to learn industry-relevant technologies.

June 2025

ELiteTech Intern

Data Science Intern

Successfully completed a structured data science internship, working on data analysis tasks and applying analytical concepts to practical problem statements with strong performance and learning outcomes.

Courses & Certification

Microsoft – Power BI Data Modelling Basics

Completed a foundational course on Power BI data modeling, gaining an understanding of data relationships, schema design, and business intelligence concepts used for building effective dashboards and reports.

IBM SkillsBuild – Data Analysis with Python

Earned certification in data analysis using Python, covering data cleaning, exploratory data analysis, and basic analytical techniques to derive meaningful insights from structured datasets.

Deloitte (Forage) – Data Analytics Job Simulation

Completed a virtual job simulation focused on real-world data analytics and forensic technology tasks, developing practical experience in analyzing datasets and interpreting business-driven insights.

Project

Project Overview:

An AI-powered virtual travel assistant currently in the early development stage, designed to help users explore tourist destinations and nearby resorts. The platform focuses on intelligent recommendations and location-based information.

Development Focus:

The project emphasizes scalable architecture and structured travel data management. Future enhancements include automation, real-time insights, and advanced AI-driven assistance.
